

CS408 Software Testing - Spring 2018

Jimmy Carlson, Janka Gál, Puja Mittal, Jason Shipp, David Worley

Higher-Order Testing: “¼ Cup” (Team 16)

Defect No.	Description	Defect Severity	Type of Higher-Order Testing	Test Case No. OR Description
1	When swiping to delete an item from the list, there is no confirmation pop up so it's really easy to delete an item accidentally and there is no way to undo a delete	2	Usability	#6: List Screen List 005 and 006
2	The team is using a free developer version of the Recipe API, which limits the total amount of API calls as well as API calls per minute.	2	Performance	Repeatedly make Recipe API calls to ensure that the app can handle the high volume.
3	The way “sorting” was implemented is very difficult to understand and work with.	3	Usability	#9: Sort Order 001 and 002
4	It is unclear how to check or uncheck an item	3	Usability	#6: List Screen List 003, 004, 005 and 006

	in the list and how to delete an item and it is too easy to mix them up			
5	App crashes when you click logout	1	Performance	#5: My-Lists Screen My-Lists 001
6	Keyboard doesn't collapse when the side menu opens and won't collapse & allow scrolling until "+ New List" is clicked	3	Usability	Open side menu
7	Searching for a recipe occasionally gets stuck in a loading loop. No error messages are displayed, or timeout happens.	2	Usability	#7: Search Recipes Search 002
8	Should be able to add a new "Sort Order" from the dotted menu as opposed to in "Settings"	3	Usability	#9: Sort Orders Adding a Sort Order
9	Adding a category to an item is unintuitive (holding down on the item)	3	Usability	#10: Categories Categories 007

10	Does not tell you that "Sort Order" with no categories cannot be applied	2	Usability	#9: Sort Orders Sort Order 002
